According to the data presented, between 2000-2020 there was a mean percent population change of 6.78%, and a standard deviation of 22.91

## Percent Change by County

- Extreme Decline**  
-45.36% - -25.00%
- Moderate Decline**  
-45.36% - -10.00%
- 9.99% - 0.00%
- Moderate Growth**  
-45.36% - 15.00%
- 15.01% - 35.00%
- 35.01% - 65.00%
- 65.01% - 100.00%
- Extreme Growth**  
-45.36% - 170.03%

Since the turn of the millennium the U.S.A. has grown by roughly 58 million with a growth rate of 0.8%. Additionally we've seen a large urban growth across the country as people have moved from rural areas to more urban areas including Austin, Dallas, New York, and much of the west coast.
